- What the numbers look like nationally
- How does Minnesota compare?
- Where to find more information
- Questions
National Statistics

- Data reported to the CDC through 2007
- 34 states and 5 territories with confidential name-based surveillance reported
  - Data for all states will be available in 2014
- Data reflects rates of infection per 100,000
Estimated Prevalence Rates for Adults and Adolescents Living with HIV Infection (not AIDS), 2007—34 States and 5 U.S. Dependent Areas

Note: Data from 34 states and 5 U.S. dependent areas with confidential name-based HIV infection reporting since at least 2003. Data have been adjusted for reporting delays.
How Does Minnesota Compare?

- Data collected by the Minnesota Department of Health – STD/HIV Section
  - Active surveillance since 1985
- 13% increase from 2008 to 2009
  - One new case reported in Minnesota every 24 hours
  - Cases reported in men under 24 have been steadily increasing
HIV/AIDS in Minnesota: New HIV Infection, HIV (non-AIDS) and AIDS Cases by Year, 1996-2009

- HIV Infection*: Includes all new cases of HIV infection (both HIV (non-AIDS) and AIDS at first diagnosis) diagnosed within a given calendar year.
- HIV (non-AIDS): Includes all new cases of HIV (non-AIDS) diagnosed within a given calendar year.
- AIDS^: Includes all new cases of AIDS diagnosed within a given calendar year, including AIDS at first diagnosis. This includes refugees in the HIV+ Resettlement Program as well as other refugee/immigrants diagnosed with AIDS subsequent to their arrival in the United States.
Living HIV/AIDS Cases by County of Residence, 2009

Number Living with HIV/AIDS

- None
- 1 - 20
- 21 - 100
- 101 - 500
- 501 – 1,000
- 1,001 – 2,000
- 2,001 – 3,635

City of Minneapolis – 2,576
City of St. Paul – 946
Suburban* – 2,066
Greater Minnesota - 940

Total number = 6,552
(24 people missing residence information)

* 7-county metro area, excluding the cities of Minneapolis and St. Paul

* Counties in which a state correctional facility is located.
Persons Living with HIV/AIDS in Minnesota by Age Group†, 2009

† Age missing for 5 people.
Persons Living with HIV/AIDS in Minnesota by Gender and Race/Ethnicity, 2009

Males (n = 5,028)

- White: 62%
- Afr Amer: 19%
- Hispanic: 7%
- Amer Ind: 1%
- African born: 1%

Females (n = 1,524)

- White: 27%
- Afr Amer: 31%
- Hispanic: 6%
- Amer Ind: 3%
- African born: 2%
- Asian: 1%
- Other: 1%

n = Number of persons  
Afr Amer = African American (Black, not African-born persons)  
Afr born = African-born (Black, African-born persons)  
Amer Ind = American Indian  
Other = Multi-racial persons or persons with unknown race
Number of Cases and Rates (per 100,000 persons) of Persons Living with HIV/AIDS by Race/Ethnicity† – Minnesota, 2009

Census Data used for rate calculations.

† “African-born” refers to Blacks who reported an African country of birth; “African American” refers to all other Blacks. Cases with unknown race are excluded.

†† Accurate population estimates for African-born persons and MSM (any race) living in Minnesota are unavailable – anecdotal (50,000) and 2000 US Census data (35,188) were used to create the range of rates reported for African-born.

^ Other = Multi-racial persons or persons with unknown race
• Foreign-Born Persons Living with HIV/AIDS in Minnesota by Region of Birth, 1996-2009

- Latin Amer/Car – Includes Mexico, Caribbean, and Central/South American countries
